Implementing Jest

I’m still working on implementing Jest, I only have the packages installed so far. Aiming to have at least 3 tests:

- Clicking links between the 3 pages changes the page correctly.
- When a recipe object is created, the number of recipes in localStorage(‘recipes’) increases by 1.
- When a recipe is clicked on in home page currRecipe is set to that recipe.
- When a recipe is deleted the number of recipes in localStorage(‘recipes’) decreases by 1.
