

Code Avengers Meeting 11/17/22

Team Leads: Triston Babers, Meron Asfaw

Attendance

take attendance at this part.

Meeting note taker: Ettore

DevTools: Linter Update

I've updated the Super Linter to show better info.

The screenshot displays a GitHub repository page for 'cse110-sp21-group36' with the 'Update README.md #30' pull request. The 'Actions' tab is active, showing a workflow with jobs: 'build', 'lint', and 'validate'. The 'lint' job is highlighted, showing it failed 8 minutes ago. A red box highlights the 'lint' job in the workflow list. To the right, a detailed view of the 'lint' job shows it failed 9 minutes ago. The failure output is a log of linting errors for 'source/assets/styles/recipe_editor.css'. The errors include issues with indentation, spacing, and declaration blocks, each marked with a red 'X' icon and a yellow star icon. A search bar labeled 'Search logs' is visible in the top right of the log view.

lint
failed 9 minutes ago in 2m 10s

New Documentation Standards

We will use JSDoc conventions for our comments above javascript methods now, since most other teams have adopted this. This is pretty much the same standards as CSE 11.

```
/**  
 * Adds two Numbers together  
 *  
 * @param data1 the first data object  
 * @param data2 the second data object  
 * @return The sum of the two objects  
 */  
function foo(data1, data2) {  
  // code  
  return data1 + data2;  
};
```

Decision: Should we have a Seperate Logo for the Website?

We already have a group logo, but should we consider having a separate logo for our website app? Maybe something that looks food-related would work better design-wise.

Our Logo:

Other Examples:

Quick Look at Project Progress

- Check team's progress with page development

3 Teams Present what they've accomplished so far:

- Home Page Team
- Recipe Editor Team
- Recipe Viewer Team

Group Code Review Session

On Thursdays, we will now do team programming, so we can integrate the 3 pages of our project

MEETING END!

That's all Folks!
