Code Avengers Meeting
12/1/22

36
Code
Avengers

Team Leads: Triston Babers, Meron Asfaw

Attendance

take attendance at this part.

Meeting note taker: Justin

Sprint 3 Review

Where we are at with Sprint Goals

View Page: Add a Recipe Delete Option (Miko, Justin) -

Home Page: Add an option to Sort by Favorites (Andy, Triston) -
Home Page: Get Navbar working on all other pages (Duc) -

Edit Page: Fill Text fields with the currRecipe data (Edit Page Team: Ettore, Thanh, Kinson, Meron)

Edit Page: Make it so that when Save Recipe is clicked, the button will redirect back to the Home Page. Should be a one-line(~~Miko?~~. (Ettore did it already)

CSS Styling: Make the website look as pretty as possible (Julia, Rappel)

Final Project Videos

These are the last 2 assignments we need to turn in, and the first one is due Wednesday next week!

Final Project Video - Public Version
Not available until Dec 2 at 12:00am | Due Dec 7 at 11:59pm | -/3 pts

Final Project Video - Private Version
Not available until Dec 2 at 12:00am | Due Dec 9 at 11:59pm | -/3 pts

Testing with Jest & Puppateer

We should assign a group to build basic test cases for the app so we can complete our End-to-End Testing Goals.
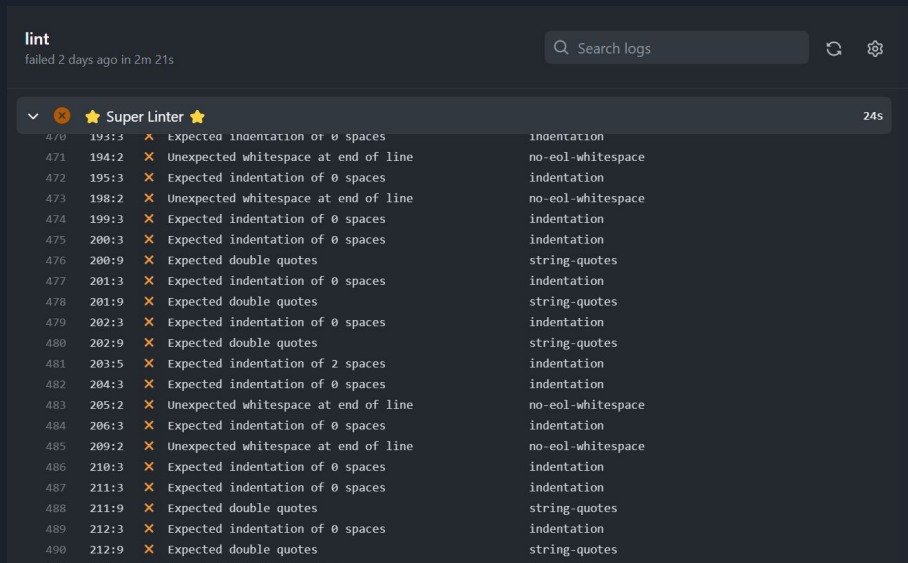

Testing with Jest & Puppateer

Possible Test Cases:

- Clicking links between the 3 pages changes the page correctly.
- When a recipe object is created, the number of recipes in localStorage('recipes') increases by 1.
- When a recipe is clicked on in home page currRecipe is set to that recipe.
- When a recipe is deleted the number of recipes in localStorage('recipes') decreases by 1.

The Testing Pipeline

I've checked the testing logs and it seems like the Super-Linter is super picky about indentation so I might have to edit the settings for that. This is kind of a low-priority issue though.

Also, is the HTML 5 Validator showing the correct information still?

MEETING END!
